RE: Monthly Progress Report for May 2004, 221 N. Columbus Drive, Chicago, Illinois - STS Project
No. 1-32193-XC

Dear Mr. Micke:

In accordance with the Work Plan¹ STS Consultants, Ltd. (STS) is providing a monthly progress report that identifies the actions taken in May and activities planned for June 2004.

ACTIVITIES COMPLETED IN MAY 2004

1. Surveying for radiologically-impacted soil was performed on only one day in May for a utility related excavation conducted at the Shoreham site located within the north slip (slip D). No evidence of radiologically-impacted soil was observed.
2. No radiologically impacted soils were handled or excavated in May 2004. Therefore, neither personal nor area air monitoring was conducted.

PLANNED ACTIVITIES FOR JUNE 2004

1. There are no specific dates planned for conducting excavation activities that will expose subsurface soil within the former slip areas. However, surveying for radiologically-impacted soil will be conducted within the slip areas if excavation occurs. The USEPA will be notified upon discovery of any radiologically-impacted materials. Following USEPA notification, excavation activities will take place to remediate radiologically-impacted soil as necessary. The USEPA will be requested to conduct verification surveys and sign-off that the areas have been successfully remediated.
2. Monthly reports will to be submitted to the USEPA until approval of the closure report.

Please contact us at 847-279-2500 with any questions regarding this report.

Regards,

STS CONSULTANTS, LTD.

Steven C. Kornder, Ph.D.
Senior Project Geochemist
